New Amdahl Computer

STATINTL The new Amdahl computer, model 470/V6, scheduled to replace the current IBM 360/195, was delivered to CIA Headquarters on 21 December 1977. The Amdahl engineers completed installation in the [REDACTED] Computer Center and turned the computer over to CIA for testing at 1414 hours, 27 December 1977. Considering this work was accomplished during the holiday season, this is quite a remarkable feat. [REDACTED] STATINTL

EAG Review

The Director of Data Processing briefed the EAG on 20 December on the overview of the top twenty-one projects consuming ODP resources. A copy of the viewgraphs was forwarded to each of the Office Directors involved. [REDACTED] STATINTL

Transfer of ODP Computer Equipment

STATINTL ODP sent a memorandum to Office of Weapons Intelligence regarding the availability of some computer equipment that could be used by [REDACTED] in support of Project [REDACTED]. One STATINTL Calcomp controller and eight Calcomp disk drives are scheduled to be available in July 1978, while one IBM 360/65 mainframe (the current 360/65-1) is scheduled to be available in October 1978. This equipment should be excess to ODP needs providing ODP's procurements progress as planned. [REDACTED] STATINTL

STATINTL Project [REDACTED]

STATINTL A copy of Mr [REDACTED] paper to the DCI concerning Project
STATINTL [REDACTED] was received by ODP. This paper is being reviewed and
comments will be forwarded. [REDACTED] STATINTL
